We strive to deliver uncompromising quality for every classroom and budget. Designed in Denmark. Manufactured in Europe and built to last – more than once.

Children spend many hours every week in school, and they should be at least as comfortable there as anywhere else.

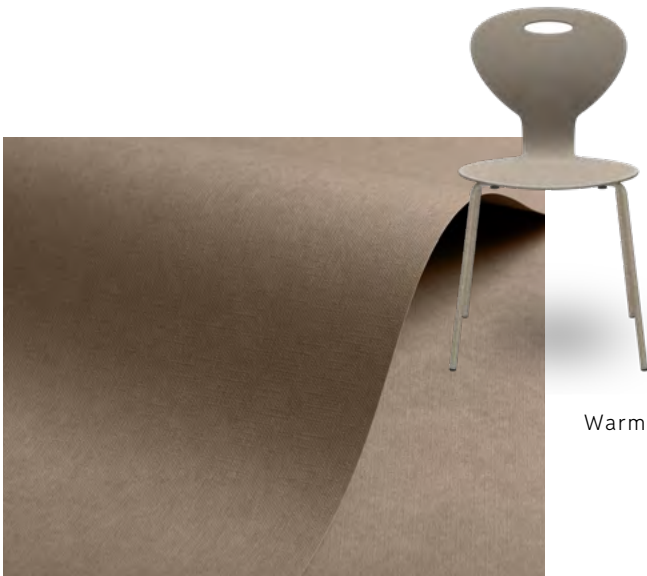

Color collection

Colors and shapes play an important role in the learning environment by enhancing both visual appeal and cognitive engagement. Colors create harmony, contrast, and movement, which can boost creativity. Meanwhile, our color collection is carefully toned to blend harmoniously without losing its vibrancy.

Dusty Terracotta

Warm Greige

Together, color influence perception, tell stories, and bring ideas to life. We're confident there's a color here that perfectly mirrors your atmosphere.

Mineral Green

Dynamic Blue

Dark Graphic

Understanding the future through the past

The world needs furniture that acknowledges the fact that children and student's needs should be met with high quality, respect and solutions to match the high standards and demands of contemporary life and work.

Children spend many hours every week in school, and they should be at least as comfortable there as anywhere else. Simply put, school furniture should be high quality, aesthetically pleasing, durable and so comfortable you forget you're sitting down.

At Petalø our mission is to deliver the perfect furniture for the modern classroom.

We have been creating classroom interiors and spaces for learning since 1950. We know the past and the present, so we understand how the future should look. Over the years we have developed a thorough understanding of the requirements of a solid classroom that properly supports learning.

But our true passion has always been designing beautiful and ergonomic furniture for younger generations, so on January 1st, 2025 we launched a complete rebranding. We have chosen to let our furniture take center stage and focus all our efforts and experience on creating the best products to furnish the classrooms of the future.

1971 – Delivery for a modern open-space classroom, designed by architect Ole Park.

Schools need to create and maintain the best possible framework for students to learn. To be able to focus, be inspired and caught up in what goes on in the classroom and not worry about anything else.

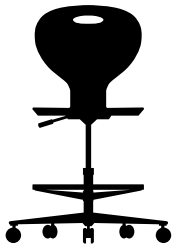

At Petalø our mission is to deliver the perfect furniture for the modern classroom.

Our signature model – the SEET – is a chair characterized by its resemblance to the petals of a flower; lightweight organic shapes in five different colors and a large variety of different bases; legs, wheels and swivels.

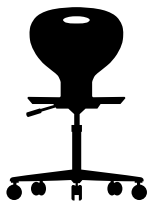

SEET chairs

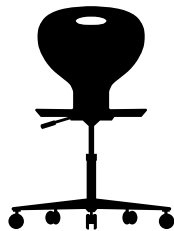

A light petal-like design makes for numerous ergonomic seating positions. It's beautiful to look at, light, modern, flexible and – above all – very comfortable.

SEET stool

Beautiful to look at, light, modern, flexible and – above all – very comfortable.

Our signature model – the SEET – is a chair characterized by its resemblance to the petals of a flower; lightweight organic shapes in five different colors and a large variety of different bases; legs, wheels and swivels.

The SEET is made from polyurethane which presents a list of unique benefits: It's durable and heavy duty but still flexible and soft. It leads heat away from the body keeping students cool even during the longest sessions. And the light petal-like design makes for numerous ergonomic seating positions.

The SEET chairs are Möbelfakta certified, meeting all the requirements for the Type 1 ecolabel and ISO 14024

SEET ergonomics

The unique quality of the SEET design and our use of polyurethane (PUR), creates what we call the “Chewinggum effect”: firm and robust on the outside, yet soft and flexible on the inside. This innovative feature delivers the most flexible seat on the market, providing dynamic comfort for hours of concentrated work.

With a strong backrest measuring just 13 cm wide, this design supports multiple seating positions and helps boost concentration.

Subjected to extensive industry testing, this seat is engineered to withstand pressures of up to 380 kg.

The lightweight design includes built-in handle on the back, allowing students to move the chairs with ease.

SEET c-frame

The c-frame chair design allows easy stacking and rearranging. The freely oscillating frame gives the student a natural and dynamic sitting.

SEET four-legged

The four-legged chair features a lightweight and timeless design, making it ideal for common areas and canteens. It's easy to move around and can be stacked in seconds.

SEET footrest

The footrest chair grows with the young student, providing years of use. In the elementary school, where student height varies, the chair offers same level collaboration.

SEET stool

The stool features a height-adjustable gas lift and wheels with automatic brake. Experience the freedom of a versatile chair designed to adapt to any situation.

SEET swivel 40+55

The swivel chair features a height-adjustable gas lift and wheels with automatic brake. Experience the freedom of a versatile chair designed to adapt to any situation.

SEET swivel 80

The swivel chair features a height-adjustable gas lift and wheels with automatic brake. Experience the freedom of a versatile chair designed to adapt to any situation.

WAVE tables

A beautiful, durable, and flexible table-solution, designed to complement a dynamic classroom environment.

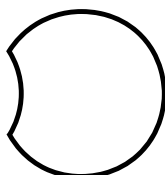

The consistent design throughout the entire series allows for seamless combinations with various models.

WAVE, a table in motion.

The organically shaped tables are designed to offer multiple configurations making sure that students and teachers can meet eye to eye and work comfortably – together and on their own. The durable surface can take a beating and be a quality foundation for learning for generations.

With our patented design, we achieve 18% more surface area than a standard triangular table – without reducing the table's width.

WAVE triangle 96/110

A beautiful, durable and very flexible table-solution. The organically triangular-shaped tables are designed to offer multiple configurations making sure that students and teachers can work comfortably – together and on their own.

WAVE circle 85/ high 85

Circle high is a teacher's podium with an easily adjustable height. With its integrated wheel, it moves effortlessly to wherever support is needed. After all, a teacher's greatest strength is adaptability

WAVE square 64/80

A beautiful, classic and very flexible table-solution. The organically square-shaped tables are designed to offer multiple configurations making sure that students and teachers can work comfortably – together and on their own.

WAVE square 130/130 high

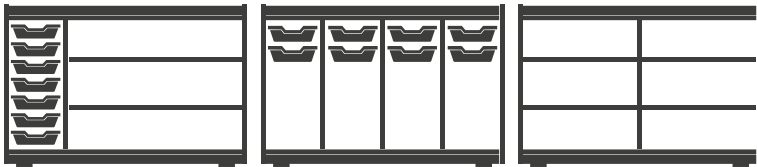

A beautiful, classic and very flexible counter table. The organically square-shaped tables are designed to offer multiple configurations making sure that students and teachers can work comfortably – together and on their own. The 90 cm height is ideal for a dynamic, multi-level classroom setup or group activities in common areas.

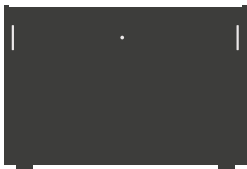

HIVE storage

A deliberate choice for furnishing the multifunctional classroom. Use it as a standard cabinet, a tabletop for flexboards, or a stand-up workstation. Combining two HIVE units creates the perfect workstation for collaborative group work.

HIVE storage 140

HIVE storage 140

A flexible storage solution, featuring wheels and are reinforced with an iron frame.

A deliberate choice for furnishing the multifunctional classroom. Combining two HIVE units creates the perfect workstation for collaborative group work.

HIVE offers a basic unit that can be fully customized to fit your needs - the possibilities are endless.

Petalø Extend™

Sustainability and money in your pocket

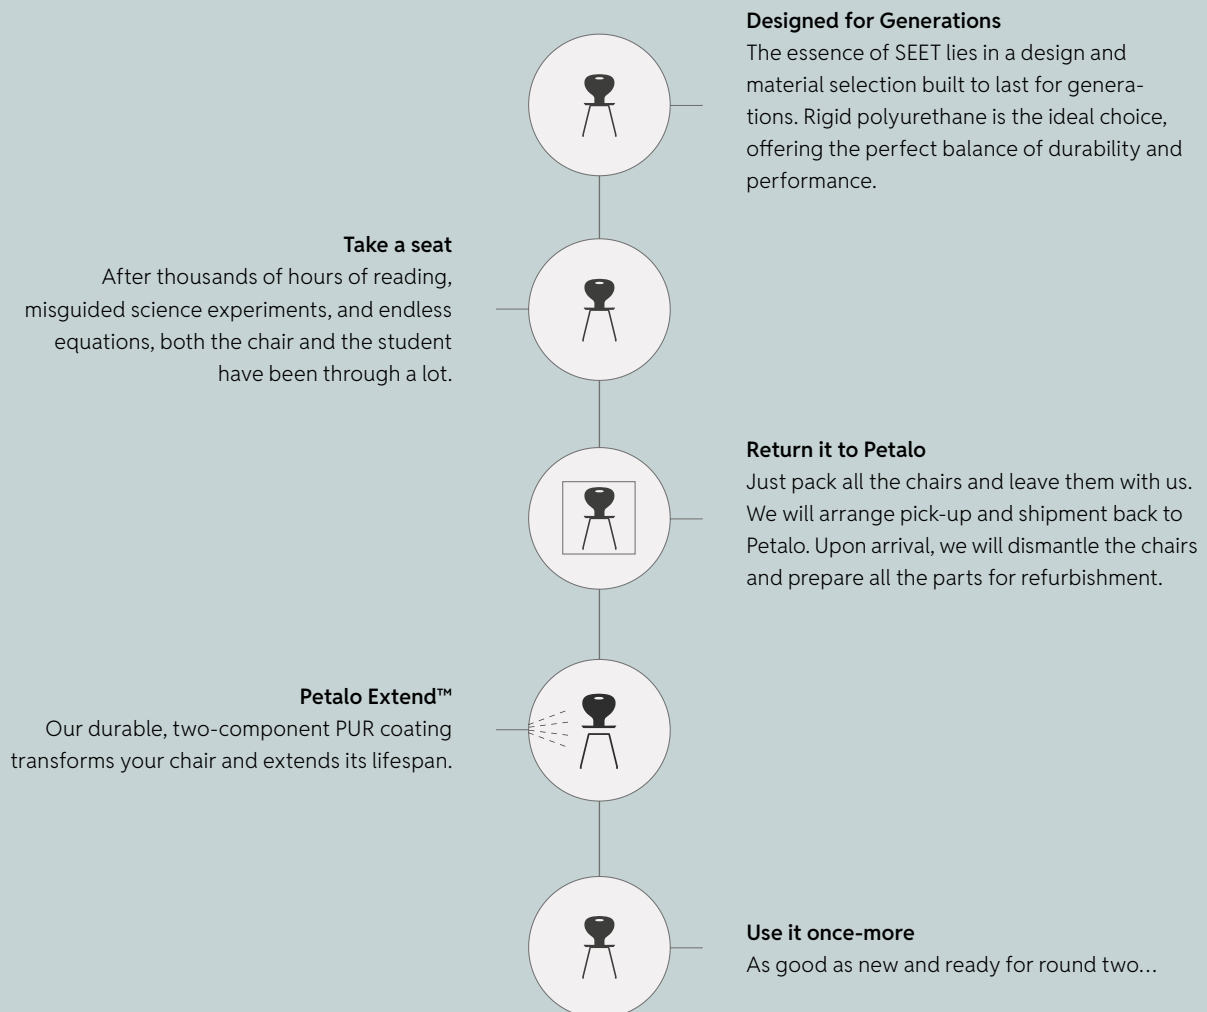

School budgets are a challenge. How do you maintain quality learning without losing the high standards over time as wear and tear takes its toll on the interior? Well, you could refurbish your chairs.

At Petalø, we are manufacturing chairs designed specifically with circularity in mind. We use polyurethane because it means you get at least two life cycles in one chair. Through our unique refurbish-solution, Petalø Extend™, we offer an easy and cheap way to get your chairs repaired and refurbished. As good as new and ready for round two. Petalø Extend™ is common sense and sustainability for the school budget as well as the planet.

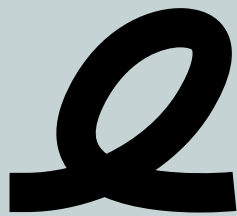

How to get started with Petalo Extend™

We offer an easy and cheap way to get your chairs repaired and refurbished. As good as new and ready for round two. Whether you'd like just the seat refurbished or the entire chair, the choice is yours.

We restore the original color and bring it back to life. With our durable, two-component PUR coating, the seat isn't just beautiful again – it's also ready to handle the everyday wear and tear of the classroom.
